Re: Water Treatment Plant and Sediment Consolidation Area – 2011-2016, Camillus (T), Onondaga County

Dear Mr. McAuliffe,

The Department has received a Stormwater Pollution Prevention Plan (SWPPP) dated April 2011 for the above project. Our review of this material has determined that the SWPPP meets the minimum requirements of the *SPDES General Permit for Stormwater Discharges from Construction Activity (GP-0-10-001)* with the following contingency:

- Any proposed revisions to the SWPPP will be submitted to the Department for review and acceptance prior to implementation; the Department will be notified of emergency or after hours revisions as soon as possible.

Authorization to disturb greater than five (5) acres of soil at any given time is also hereby granted. This acceptance does not relieve you of any other requirements listed in the General Permit (GP-0-10-001), or protect you from enforcement action initiated by this Department if permit violations are observed during inspections of the site by DEC staff.

All contractor companies involved in soil disturbing activity on the site must have a "trained contractor," who has attended a DEC-endorsed 4-hour Erosion and Sediment Control training, on site on a daily basis. Trained contractors are issued a wallet card with a trainee ID number and should be able to show their wallet card when requested by the DEC.

You must conduct inspections of the erosion and sediment controls and stormwater management structures twice weekly as required by General Permit GP-0-10-001 and you must modify those controls if they prove to be ineffective in preventing the mobilization and transport of soils from your property. The Department may also perform periodic inspections of the site to ensure compliance with this requirement.

If you have any questions or need any assistance, please contact me at (315) 426-7504.

Sincerely,

Ellen Hahn, CPESC, CPSWQ, CMS4S
Stormwater Specialist
